Projects

Wrinkle Detection with Streamlit

- Developed an interactive application in Streamlit to detect wrinkles in uploaded images, providing users with visual insights on wrinkle-prone areas.
- The system highlights detected wrinkles, allowing users to understand and analyze wrinkle patterns easily. This streamlined, user-friendly app aims to make wrinkle assessment accessible and straightforward.

Finetuned LLM Chatbot

- A language model (LLM) was fine-tuned to create an intelligent chatbot with enhanced interaction capabilities.
- This chatbot delivers more accurate, contextually relevant responses, improving user experience in conversational settings. Tailored specifically for detailed and relevant communication, it is ideal for customer support and engagement tasks.
